

Email represents the single critical utility of today's companies driving productivity, efficiency and cost savings. Unfortunately, bundled within its many advantages are significant threats which have the capacity to destroy your network and incur serious legal and financial repercussions for you and your business.

The simple act of opening an email or clicking a link can release payloads of viruses which apart from demolishing your networks internal structures, can also unleash devastating consequences for your clients by fulfilling their basic viral nature; that of spreading secretly from one computer to another with malicious intent. SpamTitan protects the organisation from threats by managing the organisation's email traffic and regulating the email that employees receive by blocking spam email, viruses and malware.

What is SpamTitan?

SpamTitan is a full-service email security solution which protects your business, your employees and your clients. The solution is extraordinarily simple to set up and manage and provides among its many features 99.97% spam detection, virus and malware blocking, authentication control, outbound scanning as well as robust reporting structures.

Why use SpamTitan?

SpamTitan has been purpose-built to enable businesses to easily protect their users and network from spam email, viruses and malware. The solution can be deployed as a gateway solution or hosted in the cloud. The cloud solution is designed to easily integrate into the existing infrastructure and deployment is very straight forward SpamTitan Cloud enable businesses to filter the organisation's email traffic without any expensive or time consuming overheads.

The Gateway solution is deployed on premise and allows a deeper level of granularity and control for a seasoned system administrator.

Product features

Spam filtering

SpamTitan filters your organisation's email traffic to stop email spam from reaching your users. The solution guarantees 99.97% spam detection through multilayered spam analysis including; real time blacklists (RBLs), lists of websites that were detected in unsolicited emails (SURBLs), sender policy frameworks and Bayesian analysis. This coupled with a low false positive rate of 0.03% allows you to rest easy knowing your users never lose genuine email, but are protected from unsolicited email.

Virus and malware blocking

The multi award winning solution contains double antivirus protection; Bitdefender and Clam AV which serve to block viruses and malware trying to infiltrate your network through email.

White listing / black listing

The solution allows you to whitelist / blacklist sender email addresses meaning you can choose to always allow / always block mail from a particular email address.

Reporting

SpamTitan can send a quarantine reports to users at specified times and intervals. The quarantine report contains a list of emails which have not been sent to the user because they potentially contain spam or viruses. The end user can decide to deliver, whitelist or delete the emails in the quarantine report.

Recipient verification

SpamTitan can send a quarantine reports to users at specified times and intervals. The quarantine report contains a list of emails which have not been sent to the user because they potentially contain spam or viruses. The end user can decide to deliver, whitelist or delete the emails in the quarantine report.

Cloud or Gateway Deployment Options

The solution can be deployed as a Gateway solution or hosted in the cloud. The cloud solution is designed to easily integrate into the existing infrastructure and deployment is very straight forward SpamTitan Cloud enable businesses to filter the organisation's email traffic without any expensive or time consuming overheads.

The Gateway solution is deployed on premise and allows a deeper level of granularity and control for a seasoned system administrator.

Outbound scanning

Outbound scanning of email is vital today. It blocks spam and viruses being sent out from your organisation, thus preventing your IPs from being blacklisted as a spammer by one of the many global blacklisting services.

IP blacklisting prevents email delivery, interferes with business process and productivity is difficult and time consuming to resolve. SpamTitan prevents this.

Authentication

The Web Authentication settings allows you to control for each Domain what Authentication Method will be used when a user attempts to login. The following authentication methods are supported: Internal (default), LDAP, SQL server, POP3, and IMAP.

The support of external authentication modules ensures that when possible users won't have to remember multiple passwords. All login attempts will be directed to the appropriate authentication server for that domain.
